

HCG

Jike Peptide - Product specifications and handling information

PRODUCT INFORMATION

Form	Sterile dried/lyophilized protein material
Appearance	White dry powder or cake.
CAS No.	9002-61-3
Protein Structure	Heterodimeric glycoprotein: alpha subunit (92 amino acids) and beta subunit (145 amino acids); glycosylation is heterogeneous.
Packaging	10 sealed vials per kit
Intended use	Laboratory research use only

AVAILABLE SPECIFICATIONS

Cat. No.	Specification
G2K	2000 iu x 10 vials
G5K	5000 iu x 10 vials
G10K	10000 iu x 10 vials

COA & TESTING

- Lot-specific Certificate of Analysis available for each production lot.
- HPLC analysis documents purity and chromatographic profile.
- Mass spectrometry may be used to confirm compound identity.
- Final test results are reported in the COA supplied with the lot.

STORAGE & HANDLING

Lyophilized material: For the research-grade vial, store at -20°C, sealed and protected from light and moisture.

After reconstitution: Store reconstituted material at 2-8°C. Do not freeze or shake. The usable period depends on the diluent and formulation and should not be stated without lot-specific instructions.
